Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-12 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No.

10/558,717. Although the claims of the copending application differs from the claims of the present application in that they recite “a plurality of information layers”, as opposed to the claims of the present application which recite “at least one information layer”, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art to broaden the claims to achieve greater scope while avoiding the prior art. The specific receiving means and the specific decoding means utilized would have been obvious to one of ordinary skill in the art in view of meeting different design requirements and achieving the particular desired performance.

Art Unit: 2878

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. The prior art made of record, and not relied upon is considered pertinent to applicant's disclosure. Terao et al (6,977,883) is cited for disclosing an information recording medium having a pair of electrodes. Van Der Mark (US 2006/0152789) is cited for disclosing multi-stack rolled-up information carrier.
